External Vibrator**

The AR26/3/230 is a high-speed external vibrator for fast and efficient concrete consolidation during construction projects.

- Normal Frequency of 3000 RPM for efficient consolidation: Saves time by quickly eliminating air pockets.
- 230V power for easy job site use: Plugs into standard outlets for convenient operation.
- Powerful vibrations for strong concrete compaction: Improves concrete strength and durability.
- Ideal for various concrete consolidation applications: Versatile tool for a wide range of concrete projects.
- Suitable for precast concrete, mass pours, and general use: Can handle a variety of concrete consolidation tasks.

Specifications

- Model - AR26/3/230
- Item No.- 5100003938
- Weight - 6.3kg
- Force - 3.47kN
- Voltage - 230V
- RPM - 3000rpm
- Frequency - 200Hz

The AR26/3/230 external vibrator is a professional tool designed to quickly eliminate air bubbles and improve concrete strength through vibration. Its normal frequency speed of 3000 RPM ensures efficient consolidation, while the 230V power allows for easy operation on most job sites. This external vibrator is ideal for precast concrete applications, mass concrete pours, and general concrete consolidation tasks.
